

Dear Headteacher

Please find enclosed some important video links which you may find useful. The videos have been developed by the South West Health Protection Team and are intended to provide a resource to support education settings in implementing government guidance.

The videos are no more than 3 minutes long, and provide information on how the measures set out in the government guidance for implementing protective measures can help settings operate safely and reduce the risk of infection, as well as describing what a setting would need to do if they have a single confirmed case, or in the event of an outbreak.

Please note, however, that these videos have been produced for settings in the South West, and any contact information may be specific to this region.

I hope you find them useful.

Regards

Dean Wallace,

Director of Public Health

COVID-19 Resource pack for Educational Settings

- South East HPT are sharing the following information, their contact number is included in the slide set and they are happy to share the materials.

The videos are no more than 3 minutes each and there is a version without music for those with hearing loss, difficulty hearing or if they aren't keen on the music!

The first video – focusing on prevention looks at the chain of infection and the protective measures that settings should put in place to minimise the risk of infections in the school and that will help prevent spread amongst those attending.

[Prevention webcast – WITH MUSIC](#)

[Prevention webcast – NO MUSIC](#)

The second video – covers a lot of definitions, for example case and contacts as well as describing the actions a setting need to put in place if they have a single confirmed case of COVID-19 in the setting.

[Management of Single Cases – WITH MUSIC](#)

[Management of Single Cases – NO MUSIC](#)

The final video covers definitions of cluster and outbreak and describes what a setting would need to do in the event of an outbreak.
