

Attachment Aware Schools

A Safe Space, a Nurturing Learning Community

The Attachment Aware Schools Programme has been created by Derbyshire's Virtual School and is a year long partnership project with schools and settings. Through working together we explore and develop best practice for Children in Care and all vulnerable learners.

Dates for the full programme are:

Sharing and launch event on 2nd July and the following workshop days: 11th September, 17th October, 19th November, 5th December plus two further days in 2020 to be negotiated.

Part of the selection for the whole programme will be to ensure that 2 members of your staff will attend 100% of the training. They will then lead a supported action research project back in your school or setting, plus share your findings with the Virtual School and join the Attachment Aware Schools (AAS) Network in Derbyshire.

Our Commitment to you:

- FREE training
- Improved knowledge and skills for your school community
- Project Associate to support your action research project
- Opportunities to share your great practice with the whole of Derbyshire and beyond
- Access to E-learning package and downloadable materials free to participating schools
- Fantastic CPD opportunity for your staff and for whole school development

Your Commitment to us:

- 100% attendance at the taught days
- 2 members of your staff to consistently attend the whole programme (one being a senior leader)
- An agreement to undertake an action research project in your school setting
- Work collaboratively with the Virtual School and others on the programme
- Evaluate and share your work
- Be active participants in the AAS network in Derbyshire

Lizzie Watt - Assistant Head Teacher: Innovation, Teaching & Learning

Dr Paul Kelly - Specialist Senior Educational Psychologist
